## What's a Wicked Problem?

In 1973, design theorists Horst Rittel and Melvin Webber introduced the term “wicked problem” in order to draw attention to the complexities and challenges of addressing planning and social policy problems. Unlike the “tame” problems of mathematics and chess, the wicked problems of planning lack clarity in both their aims and solutions. In addition to these challenges of articulation and internal logic, they are subject to real-world constraints that prevent multiple and risk-free attempts at solving. As described by Rittel and Webber, wicked problems have 10 important characteristics:

- 1) They do not have a definitive formulation.
- 2) They do not have a “stopping rule.” In other words, these problems lack an inherent logic that signals when they are solved.
- 3) Their solutions are not true or false, only good or bad.
- 4) There is no way to test the solution to a wicked problem.
- 5) They cannot be studied through trial and error. Their solutions are irreversible so, as Rittel and Webber put it, “every trial counts.”
- 6) There is no end to the number of solutions or approaches to a wicked problem.
- 7) All wicked problems are essentially unique.
- 8) Wicked problems can always be described as the symptom of other problems.
- 9) The way a wicked problem is described determines its possible solutions.
- 10) Planners, that is those who present solutions to these problems, have no right to be wrong. Unlike mathematicians, “planners are liable for the consequences of the solutions they generate; the effects can matter a great deal to the people who are touched by those actions.”

Climate change, like problems in education policy and public health, is a wicked problem. It avoids straightforward articulation and is impossible to solve in a way that is simple or final. Our changing conversations around climate science and conservation, the unique regional factors that determine the local consequences of climate change, and our ability to present endless possible solutions (as well as the irreversibility of these solutions) require we approach climate change with holistic and collaborative reasoning in search of long-term, future focused solutions.

As scholars who work in the environmental humanities our goal is to understanding the problems of climate change while also critiquing the language and methods we use to articulate those problems.

## The nature of intractable conflict: Resolution in the twenty-first century

The term 'intractable conflict' is widely perceived as an impossible dilemma: a situation with which there is no positive outcome, no solution. These are the conflicts alleged to stubbornly elude resolution despite the use of popular conflict management techniques available. Intractable conflict, a vast area of concern, has often been characterised by the prolonged violent actions of state actors or communities in response to harmful social or cultural hardships. Redress and/or revenge are motivating factors. These conflicts have survived because of deep-rooted and complex attitudes, behaviours and situations which seem to be impenetrable to methods of resolution. Or are they? Christopher Mitchell in his book *The nature of intractable conflict: Resolution in the twenty-first century*, sets out to unpack the nature and behaviour of intractable conflicts of the twenty-first century. The book provides a detailed and intriguing overview of how certain conflicts became intractable, of the reasons for their prolonged survival and possible steps towards their termination. Over all, Mitchell attempts to provide a roadmap, not to lasting peace and security, but towards building a practical understanding of the theoretical issues and applicable techniques.

## TCOLE Mission

### Our Mission

The mission of the Texas Commission on Law Enforcement, as a regulatory state agency, is to establish and enforce standards to ensure that the people of Texas are served by highly trained and ethical law enforcement, corrections, and telecommunications personnel.

----

I have attempted to contact on December 1st, 2021 The Texas Commission For Jail Standards with a Complaint, but that complaint was not taken seriously and was closed with no actions taken.

Dear Williamson County Fire Marshall,

I was an inmate at Williamson County Jail.

There is a condition in the jail that needs immediate correction.
